Professional Summary

DevOps Engineer with 1.5+ years of hands-on experience in Microsoft Azure, Terraform, CI/CD pipelines, Docker, and Kubernetes. Skilled in cloud infrastructure automation, Linux administration, DevSecOps practices, and scalable deployment environments. **Microsoft Certified: Azure Administrator Associate (AZ-104)** with practical experience in Azure and AWS cloud platforms.

Technical Skills

Cloud Platforms	Microsoft Azure, AWS
Infrastructure as Code	Terraform, Ansible
CI/CD Tools	GitHub Actions, Jenkins, Azure DevOps
Version Control	GitHub, GitLab CI, Azure Repos
Containers & Orchestration	Docker, Kubernetes
Monitoring & Observability	Prometheus, Grafana, Azure Monitor
DevSecOps & Code Quality	SonarQube, Super Linter, Trivy, TerraTest
Scripting & Configuration	Python, Bash, YAML
Operating Systems	Linux, Ubuntu, Windows

Work Experience

Junior DevOps Engineer

May 2026 - Present

Forte WebAsha Technologies Pvt. Ltd.

Pune, India

- Designed and maintained CI/CD pipelines using GitHub Actions and Jenkins, enabling automated build, test, and deployment workflows.
- Managed containerized applications and infrastructure using Docker, Kubernetes, Terraform, and Linux administration practices.
- Supported cloud infrastructure provisioning, configuration, and automation across Microsoft Azure and AWS environments.
- Implemented Infrastructure as Code (IaC), monitoring solutions, deployment automation, and DevOps best practices to improve operational efficiency.

DevOps Engineer Intern

November 2024 - October 2025

DevOps Insiders Pvt. Ltd.

Noida, India

- Automated Azure infrastructure provisioning, including Virtual Machines, VNets, NSGs, and Storage Accounts using Terraform.
- Developed and maintained CI/CD pipelines using GitHub Actions and Azure DevOps for streamlined application delivery.
- Containerized applications with Docker to ensure consistency, portability, and reliability across environments.
- Integrated automation, code quality, and deployment validation processes to enhance infrastructure reliability and delivery efficiency.

Projects

Smart Logistics & Supply Chain Platform on Azure | Enterprise Logistics Client May 2026 – Present

- Deployed a production-grade Azure Kubernetes Service (AKS) environment using Terraform modules, Azure networking components, and Azure Container Registry (ACR).
- Implemented CI/CD and GitOps workflows using GitHub Actions, Docker, Helm, and ArgoCD for automated application delivery and release management.
- Integrated Prometheus, Grafana, SonarQube, and Trivy for monitoring, observability, code quality analysis, and container vulnerability scanning.
- Configured Kubernetes resources including Ingress Controller, ConfigMaps, Secrets, RBAC, and HPA to enable secure, scalable, and highly available deployments.
- Leveraged Azure Key Vault and DevSecOps practices to manage secrets securely and improve deployment reliability across environments.

Education

B.Tech in Computer Science and Engineering
Bachelor’s Degree Program
CGPA: 8.4/10
Relevant Coursework: Cloud Computing, Operating Systems, Computer Networks, DBMS

Dr. A.P.J. Abdul Kalam Technical University
Sep 2022 - Apr 2026

Intermediate (PCM + CS) & High School
Senior Secondary & Secondary Education
Intermediate: 78%
High School: 79%

Maa Durga Ji Senior Secondary Vidyalaya (CBSE)
Apr 2017 - May 2021

Certifications

- Microsoft Certified: Azure Administrator Associate (AZ-104) *April 2026*
- Professional Certificate in DevOps – Oracle University *October 2025*
- Linux for DevOps Engineers and Developers – Udemy *June 2025*

Extracurricular Activities

Active GitHub Contributor
DevOps & Cloud Projects
Built and maintained hands-on DevOps, Terraform, Azure, Docker, Kubernetes, and CI/CD projects with practical implementations.

June 2024 - Present
India

Continuous Learning Enthusiast
Cloud & DevOps Upskilling
Regularly upskilled through certifications, labs, real-world projects, and Azure ecosystem practice focused on DevOps and Cloud Automation.

2024 - Present
India
